email [bzeller@nred.org](mailto:bzeller@nred.org)

Show Length is approximately 50 minutes.

The sky in New Rochelle still glistens with the cool, crisp stars of winter. Mars hovers on this night just above a waxing gibbous Moon. The Sun will be at the Vernal Equinox on March 20 at 1:32pm to begin spring. If the skies over NRHS stay clear and dark, telescopes will be set up on the roof to view this beautiful site.
